Implementation: To be determined by each Service

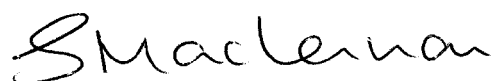

Change Notification UK National Blood Services No. 20 - 2012

Malaria

Applies to the Geographical Disease Risk Index (GDRI)

Following an assessment of risk the entries in the Geographical Disease Risk Index (GDRI) for Iran and Iraq have been re-written and the entry for Vietnam has been revised to include main cities and international airports.

Country	New GDRI Guidance for Malaria
Iran	Malaria risk exists from March to November in rural Iran south of Kerman City – Cat C
Iraq	Malaria risk May to November in areas below 1500m north of Tikrit City – Cat C
Vietnam	All year in whole country. Visitors to Ho Chi Min City, Hanoi, Da Nang and their 4 international airports only, accept – Cat B
