

**Date of publication:** 22 December 2009

**Implementation:** To be determined by each Service

## **Change Notification UK National Blood Services No.35 - 2009**

# **Complementary Therapy**

**Applies to the following:**

- **Tissue Donor Selection Guidelines - Live Donors**
- **Tissue Donor Selection Guidelines - Deceased Donors**
- **Cord Blood Donor Selection Guidelines**
- **Bone Marrow and Peripheral Blood Stem Cell Donor Selection Guidelines**

### **Obligatory**

#### **1. Must not donate if:**

The condition for which treatment was given is not acceptable.

#### **2. Therapies involving penetration by needles:**

##### **Must not donate if:**

Less than four months from completing treatment.

### **Discretionary**

#### **Therapies involving penetration by needles:**

##### **1. Performed within the NHS**

If performed by a suitably qualified NHS healthcare professional on NHS premises, accept.

##### **2. Performed outside of the NHS**

If performed by a Qualified Health Care Professional registered with the General Medical Council (GMC), Nursing and Midwifery Council (NMC), General Dental Council (GDC), The General Chiropractic Council (GCC), The General Optical Council (GOC), The General Osteopathic Council (GOsC) or The Health Professions Council (HPC) (which regulates: Arts therapists, Biomedical Scientists, Chiropodists/ Podiatrists, Clinical Scientists, Dieticians, Occupational Therapists, Operating Department Practitioners, Orthoptists, Paramedics, Physiotherapists, Prosthetists and Orthotists, Radiographers, Speech and Language Therapists), accept.

### **See if Relevant**

Acupuncture

### **Additional Information**

Equipment that has been reused has passed infection from person to person. Therapists who are subject to discipline from statutorily constituted professional authorities should not re-use needles.

This guidance presumes that a validated NAT test for hepatitis C is negative, if this test is stopped for any reason the guidance will change.

When there is any doubt about infection being passed on, waiting four months means infections are more likely to be picked up by the tests used by Blood & Tissue Services.

#### **Reason for Change**

The deferral period has been reduced from 6 to 4 months to reflect updated JPAC Standing Advisory Committee on Transfusion Transmitted Infections guidance on infection risk. (JPAC paper 09-34)

JPAC considers statutory registration of practitioners to afford the best overall guarantee that blood donated by acupuncture patients is safe. In the absence of statutory regulation of acupuncture, there is currently no single body to which all acupuncturists are accredited, and so to continue with the approval of one or more organisations would necessarily mean that others of possibly equal merit were excluded from approval. Voluntary registration with a non-statutory body cannot provide assurance as to how high the standards of an organisation's members are or how diligent the non-statutory regulator is in enforcing them or the practitioner in applying them. Practitioners who choose not to join a voluntary register are still able to practise legally and to use the relevant title, as will a practitioner who has been removed from the register by the registering body. There is no way of policing the enforcement by voluntary associations of the standards they require of their members as the organisations are not subject to supervision by the Council for Regulatory Healthcare Excellence (CHRE). Nor is there currently any external, independent consideration of "fitness to practise" cases referred to voluntary regulators. While statutory regulation cannot guarantee the absence of risk, its primary aim is to deliver enhanced patient safety and public protection. Statutory "protection of title" means that donor centres can safely assume that a person who practises in the name of the registered profession is actually registered.
