

Guidelines for the Blood Transfusion Services

12.6: Test procedure

<http://transfusionsguidelines.org/red-book/chapter-12-donation-testing-red-cell-immunohaematology/12-6-test-procedure>

12.6: Test procedure

Test procedures must:

- be validated before being introduced into routine use
- be written in the form of standard operating procedures
- be performed in compliance with the standard operating procedures
- be monitored and reviewed
- be performed by trained/competent staff and the training records must be maintained
- include the recording of test results.
